In-Company Learning and Development Solutions

A. Training Needs Analysis (TNA)

As a progression of the competency models, a specialised system for Training Needs Analysis (TNA) was developed. This advisory work help our clients identify training requirement and skill gaps, an essential means for supporting career development, succession planning and recruitment. With the training need analysis concluded, we design and deliver competency enhancement programmes through a mixture of learning courses, on the job training and Monitored Professional Development Schemes (MPDS)

B. In-House Courses

In house courses and consultancy accounts for half of our business activities and is delivered as required by clients in any location. We have developed a distinctive approach, offering organisations training that are carefully tailored to suit their need. We believe that the workforce need to learn continuously throughout their careers to enable them overcome new challenges.

Our programmes are significant investment for your workforce. They are designed to fill identified industry knowledge gap and provide hands-on applicable knowhow that give participants a deeper insights on their deliverables. The various modules are cultured to encourage stakeholders to aspire the attainment of operational efficiency along the business chain.
